Respected Sir,

I am writing to express my interest in working as an intern in your company. I am currently a third-year student in MIT World Peace University under the B.Tech Programme in the computer science department and I am particularly interested in Web Development and Data Science fields.

Our curriculum includes a term of internship to learn about working in a professional environment and I would like to use this as an opportunity by interning in your company. I have completed various courses which have taught me the skills required to develop a website or a web application from scratch and have successfully applied these skills on my various personal as well as academic projects. I have also worked in a team for the academic mini projects required to show our understanding for the particular course. I have a good CGPA score for all my previous terms. I am looking for an internship where I can apply my skills as well as get my hands on experience working in the professional environment.

Thank you for taking the time to review my resume. I genuinely believe that my education and skills would help me make a positive contribution to your organization. I'm particularly excited about the opportunity to learn more about web development skills and how I can contribute to that effort.

Best Regards,

Sanskar Biyani.
